PROFESSIONAL SUMMARY

Backend, Full Stack, and AI/ML Software Engineer with 5 years of experience designing scalable distributed systems, real-time data pipelines, and AI-powered features across retail, fintech, and EV domains. Proficient in Java, Spring Boot, AWS, and GCP; pursuing an MS in Computer Science (AI/ML specialization) at UT Austin.

EDUCATION

The University of Texas at Austin

MS, Computer Science (AI/ML Specialization).

2027

Bharati Vidyapeeth's College of Engineering for Women, Pune

BE, Computer Engineering.

2020

EXPERIENCE

Software Engineer 2

May 2025 – Present

Best Buy

- Developed gifting conversation feature with intent prediction and personalized recommendations, increasing conversion rates by 15% during promotional periods.
- Built real-time agentic chat via SSE/AG-UI/A2UI protocols, cutting perceived response latency by 35% via token-by-token streaming.
- Implemented cross-channel service context persistence so a planner agent retrieves prior conversation state when users switch surfaces (app to dotcom), eliminating redundant order lookups.
- Integrated CARE and AskBlue into a unified conversational journey with progressive login, increasing agentic-assisted engagement by ~20% and purchases by ~12%.
- Architected GCP data pipelines (BigQuery, Cloud Scheduler, Pub/Sub) processing 2M+ daily events at 99.9% reliability; built Java/Spring Boot services cutting API response times by 40% with Memcached caching reducing server load by 60%.
- Led ELB-to-ALB migration reducing infrastructure costs by 20%; deployed blue-green/canary releases cutting deployment incidents by 70%, and maintained 99.95% uptime under 3x traffic during Black Friday/Cyber Monday.

Software Development Engineer

Nov 2023 – May 2025

Wissen Technology

- Clients: Goldman Sachs (Investment Banking), Spiro (Electric Vehicles)
- Engineered API integrations and optimized AWS infrastructure using Java Spring Boot, ensuring 99.9% uptime for post-trading settlement operations processing 8M+ daily trades.
- Built trade processing pipeline converting SII (A2V2) messages to XML instructions; implemented CI testing using FitNesse for automation and regression testing.
- Implemented multithreading with executor service and CompletableFutures, improving system performance by 70%; enhanced API security using JWT.
- Wrote Jenkins CI/CD pipelines in Groovy, reducing deployment times by 80%; deployed Docker containers using Kubernetes on AWS EC2.
- Expanded EV platform customer base from 2 countries to 5, including Rwanda, Kenya, and Uganda, through backend system optimization.

Full Stack Engineer

Jul 2021 – Nov 2023

Tata Consultancy Services

- Optimized TCS iON Digital Marking Hub load times from 15s to 2s via asynchronous web APIs, serving 500+ organizations.
- Reduced API calls by 75% (10K to 2.5K monthly) via debouncing, improving search bar responsiveness by 50%.
- Implemented multi-language support (Hindi, Japanese, Arabic), increasing international user engagement by 30%.
- Delivered zero-defect release rate through CI/CD best practices and cross-functional collaboration using Jenkins.

PROJECTS

Placement Prediction Web Application

- Built ML application using Python and Logistic Regression achieving 89% accuracy; utilized by 10,000+ students with sub-second prediction times.

Hotel Review Sentiment Analysis

- Implemented NLP sentiment analysis pipeline with preprocessing optimizations, reducing dataset size by 20% and model execution time by 40%.

Ad Selection using Reinforcement Learning

- Built RL model using Thompson Sampling to dynamically optimize ad selection, maximizing CTR through reward-based learning.

CERTIFICATIONS

- Java & DSA (Scaler)
- Machine Learning & Python Time Series (Udemy)
- HTML/CSS/JS (Microsoft)

AWARDS & HONORS

- Won Hackathon at the Advanced AI Engineering Campus Immersion (Scaler x CEC IIT Roorkee)
- Received iON Star of the Quarter Award for delivering project 2 weeks ahead of schedule with 15% efficiency increase
- Published research paper in IEEE on Impact of Covid-19 on Education Using Twitter Data at the 16th SMAP Conference, Greece

SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks & Tools: Spring Boot, Microservices, REST API, Docker, Kubernetes, Jenkins

Cloud & Data: AWS, GCP, BigQuery, Pub/Sub, Memcached, Splunk

Databases: PostgreSQL, MySQL, MongoDB, Cassandra

AI/ML: Generative AI, Reinforcement Learning, NLP, NumPy
